Stewart Lab, Biotec Tatzberg 47, 01307 Dresden, Germany

Area of Expertise

ChIP-Seq, RNA-SEQ, NGS data analyis, open source, high performance computing, complex data visualizations.

Programming Languages

R, Bash/Shell, Javascript, Perl-CGI, HTML, CSS, LATEX

Extra Curricular Activities

♥ Hiking, Regular volunteering in Eco -Conservation and Social Innovation projects, Biking, Ultimate Frisbee, Lead national/international hike tours, Globe trotting, Djing, Peak bagging.

Access this CV online

Resume

Currently working at **Biotec** - Technical University of Dresden. My major research interests are computational **epigenetics**, investigating **histone modifications** and understanding **transcriptional** machinery in mouse **embryonic and differentiated stem cells**. I have been developing **computational pipelines** to handle and analyse the plethora of **NGS datasets** generated in-house and collaborating labs utilizing **High-Performance** computing. I have worked in diverse settings in several team-based and independent projects, where I have gained extensive computational, leadership, presentation, **independency** and large project organization skills in a broad range **scientific international environment**.

Research Experience

July, 2011 - **BIOTEC - Technische Universität Dresden**

Dresden, Germany

Bioinformatician and PhD Student

Working with **Prof. Francis Stewart** on Investigating Transcriptional and Epigenetic foundations of Ground State of Pluripotency and UP and several other collaborative projects. I have created automated data pre-processing and analysis pipelines utilizing HPC for next generation sequencing datasets (ChIP-Seq, RNA-Seq).

Aug - Sep,2011 **Wellcome Trust Sanger Institute**

Cambridge, UK

Visiting Researcher

Worked with **Dr. Vivek lyer** on correlating gene targeting efficiencies with gene trap counts and the homology of 5" end repeats using the EUCOMM recombineering targeting vector resource.

Oct - April, 2011 Imperial College London

London, UK

Visiting Researcher

Worked with **Dr. Becca Asquith** for investigating viral (SIV) dynamics using NGS datasets to identify specific tissues that could be initial drug delivery sites by measuring viral escape rates in animals. R package for the viral data analysis capable of processing large sequences was developed.

July - Sept, 2010 Imperial College London

London, UK

Visiting Researcher

Worked with **Dr.Timothy Ebbels** on detailed analysis of LCMS data for identification of parent fragment pairs and investigation of coelution. R package **LCMStats** was developed.

July - Aug, 2009 University of Leicester

Leicester, UK

MSC Steered Research Project-2

Developed a web application called as **WebModeller** using Perl-CGI for proteomic data analysis and 3D modeling of a novel protein sequence.

June - July, 2009 University of Leicester

Leicester, UK

MSC Steered Research Project-1

Microarray analysis to identify circadian genes from array profiles generated from Rat's Suprachiasmatic Nucleus.

Nov - Jan, 2009 **IPradar, Portus Corporate Finance**

Berlin, Germany

Biomedical Market Research Project

Analysis of relationships between diseases and technologies within a medical specialty and construction of a data resource of companies utilizing these technologies for surgical and non-surgical methods of spine.

Education

Jan, 09 - Jan, 10 University of Leicester Leicester

MSc in Bioinformatics (Merit)

Thesis: Structured Spreadsheet Web Interface for Neurophysiology Data Analysis. A web-application was developed for a functional reactive programming language called as Bugpan intended for experimenting on and

modeling of dynamic systems

Aug, 04 - Jul, 08 Kurukshetra University Kurukshetra, India

B.Tech in Biotechnology (First Class Honours)

Major Project: Drug Discovery for kidney stones using natural products

Internships

Jul - Aug, 07 Tulip Group of Companies Goa, India

Manufacturing and production of diagnostic kits, quality control and global distribution.

Jun - Jul, 06 IBI Biosolutions Chandigarh, India

Training on in silico drug designing while finding potential drug for measles.

Jan - Feb, 06 Creades Technologies

Training program in advanced Bioinformatics software and applications.

Awards

Sep, 14 German Stem Cell Network (GSCN) Travel Award Hydra, Greece

For European Summer School on Stem Cells & Regenerative Medicine (Hydra-X)

Jun, 12 European Cooperation in Science and Technology (COST) Travel Award Espoo, Finlan

For attending NGS workshop at CSC IT Center for Science Ltd

Aug - Sep, 07 Studentship by DAAD (German Academic Exchange Program) Wilhelmshaven, Germany

For attending summer course 'Biomedical Engineering in a European Perspective' at FH-OOW. I gained 6 ECTS

Noida, India

credits and was evaluated as 'highly recommended'.

Mar, 07 ABHIYAAN-2007 Mumbai, India

Third prize in ScrewDaBug contest at a national level technical And cultural festival.

Nov, 06 **VENATIO-2K6** Haryana, India

Second prize in web designing contest at a national level technical symposium.

Feb, 06 Environment Day Consolation Prize Haryana, India

For "BioGas Plant" model in a state level competition by the Dept. of Renewable Energy.

Talks and Posters

Mar, 15 Program of Early Mammalian Development and Systems Biology of Stem Cells (T) Oberstdorf, Germany

The H3K4 Methylation System in Mouse Embryonic stem cells

Nov, 14 Systems Biology of Stem Cells and Reprogramming (SYBOSS) Annual Meeting (T) Cologne, Germany

Extracting the most out of your ChIP-Seq datasets

Apr, 13 Gene Regulation and Information Theory (T) Halle, Germany

Investigating genome wide dynamics of histone methyltransferases in mouse ESCs.

Apr, 13 Deep Sequencing Day (T) Dresden, Germany

Next Generation Sequencing in Epigenetics.

Jul, 13 12th European Conference on Computational Biology, ISMB/ECCB (P) Berlin, Germany

Investigating genome wide dynamics of histone methyltransferases in mouse ESCs (also volunteered)

Feb, 13 **Syboss/Digtop Workshop (T)** Dresden, Germany

Genome wide dynamics of Setd1a Complex

Extracurricular

Jan, 13 - current Biostars.org Worldwide Access

Editor at BioStar: An Online Question & Answer Resource for the Bioinformatics Community.

Jun - Jul, 15 **Ryfylke Outdoor Recreation Board (Ryfylke Friluftsråd)** Lindoy, Norway

Volunteer with Ryfylke Friluftsråd for ensuring general public access to the recreational areas.

Aug, 2014 Lysefjorden Utvikling AS Lysefjord, Norway

Volunteer with Lysefjorden Utvikling for Trail maintenance and repair.

Jul, 12 Global Foundaries Inc. Radebeul, Germany

Participated in Futurabia, a four day industry organizational simulation game
